C 1 Package 3/12

/// Data Sheet

The C 1 static jacket oxygen bomb calorimeter provides a high degree of automation and has the smallest calorimeter footprint available. It operates according to DIN 51900 and ISO 1928. The temperature readings are analyzed according to the classical isoperibol method of Regnault Pfaundler.

With the package 3/12 including C 1.20 water heater it is possible to operate the C 1 with drinking-quality tap water in a temperature range of 5 °C to 25 °C (water temperature)
